Medistri SA's Earthwork & Construction Begins - Medistri

🚀 Medistri SA's Earthwork & Construction Begins

On the 29 of November, Medistri has been granted its building permit for the construction of an extension and realization of new facilities. Since its foundation in 2006, Medistri has continued to grow into one of the leading providers of contract sterilization & laboratory services for healthcare companies.

Medistri has grown to become a dependable partner for businesses in the pharmaceutical, medical device, aerospace, and biotechnology sectors. We provide infrastructure for new ventures when they get started and for existing companies to grow globally.

✓ In order to keep up with the growth expectations of our customers, we are pleased to inform that Medistri's expansion will begin mid-March.

The expansion includes a production building as well as storage facility with a capacity of 2000 pallets. The investment to develop this new extension will amount to approximately CHF 8'000'000.

👉 This expansion will allow Medistri SA to develop and increase its production at its headquarters in Domdidier. Medistri intends to increase its staff by 20% by creating additional jobs in the region over the course of the year.

This expansion reduces the barriers to healthcare product development & scalability, allowing our costumers to save time, scale and focus on what they do best.

📍 The new facilities will be located at Medistri's headquarters in Domdidier. For more information, please visit www.medistri.swiss or contact contact@medistri.swiss.
