

Providing Sterilisation & Laboratory Services
for the world's most innovative healthcare
companies.

Our Environmental Commitment

ISO 14001 Certified

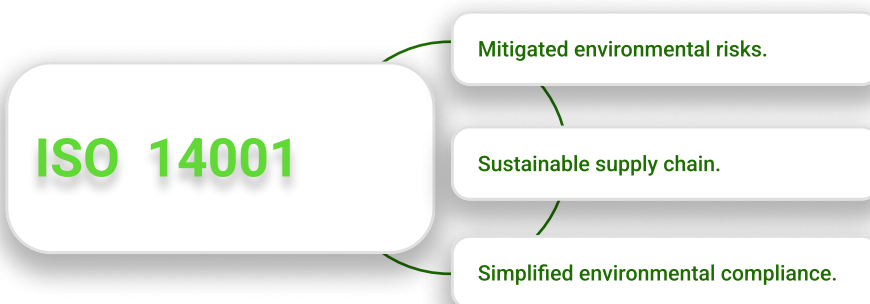

At Medistri, we're focused on offering great services and infrastructure for healthcare companies with the task of bettering our planet. We take responsibility for our services throughout their entire cycles—from sourcing materials, managing processes to forwarding the products to our customers. We focus on the areas where we can make the biggest difference for our planet: reducing our impact on climate change, conserving important resources and using safer materials. To achieve our objectives, we focus on scalable innovation. Designing and implementing new technologies, mobilising financing structures, and rapidly deploying renewable energy.

Achieve your environmental targets.

Starting 2024, Medistri is now certificated with ISO 14001. Medistri is committed to environmental excellence and sustainability - that's why we have adopted and implemented the ISO 14001 standard for environmental management systems. This standard helps us identify, manage, monitor, and control our environmental issues in a holistic way. It also enables us to continuously improve our environmental performance and achieve our strategic objectives.

At Medistri, we care about the environment and our impact on it. That is why we have implemented an Environmental Management System that follows the ISO 14001 standard. This system allows Medistri to improve our plan on how to:

- Identify and assess how our activities, products, and services affect the environment.
- Create an environmental policy that reflects our values and goals.
- Set objectives and targets to reduce our environmental footprint.
- Comply with all the legal and regulatory requirements that apply to us.
- Establish processes and procedures to ensure we meet our environmental commitments.
- Take actions to improve our environmental performance continuously.

ISO 14001 advantages for Medistri's customers

By following the ISO 14001 standard, we have not only demonstrated our compliance with the relevant legal and regulatory requirements, but also gained the trust and confidence of our customers and partners. This achieving will result into significant benefits in terms of reducing our environmental impact, optimizing our resource use, and enhancing our operational efficiency.

Medistri's Commitment.

At Medistri, we're focused on using our resources to combat climate change. We believe our commitments are both ambitious and necessary. ISO 14001 certification grants Medistri the following advantages:

- Identification of the environmental aspects of Medistri's activities and services.
- Reduction of emissions.
- Compliance with regulatory requirements.
- Transparent communication with the community, partners and suppliers.

ISO 14001

ISO 14001 is a voluntarily applied international standard aimed at implementing an Environmental Management System within companies and organizations of all sizes, and in all business sectors. It is part of the ISO 14000 international standards framework (ISO 14000, ISO 14001 and ISO 14004), which apply to all environmental management. This achievement marks a significant milestone in our commitment to sustainability and reducing our impact on the environment.

EMS objectives.

Since the foundation of Medistri in 2006, we have been highly focused on offering the solutions that will benefit our customers, our community and the future of our planet. Adding the ISO 14001 to our process will help Medistri:

- Reducing the environmental impact of Medistri's activities.
- Strengthen our environmental policy.
- Provide proof of Medistri's commitment to global environmental conservation and protection.
