

Providing Sterilization & Laboratory Services for the world's most innovative healthcare companies.

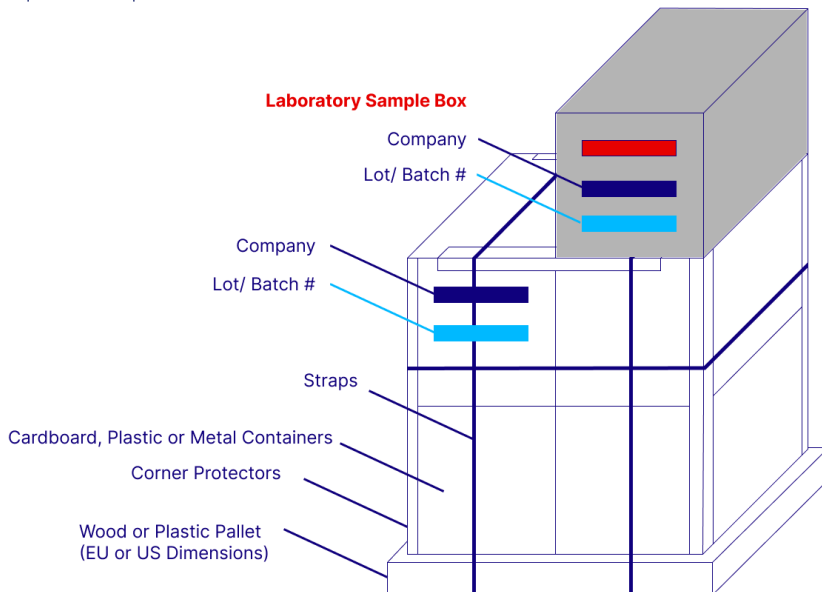

Europe's Largest Independent Contract Sterilization Company

Designing your Pallet

Proper pallet configuration is crucial not only for the safety of the products but also for ease of merchandise identification and sample picking.

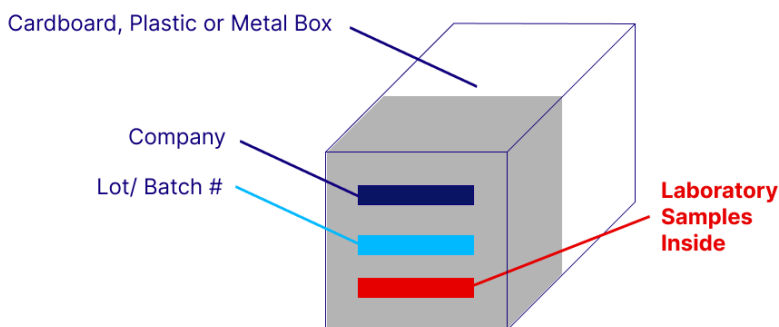

Example: 1

Pallet(s) with products for sterilisation with a dedicated Laboratory Sample box placed on top. No manipulation required.

Example: 2

Box(s) for sterilisation with Laboratory Samples inside of the Box. Manipulation required to collect laboratory samples.

Pallet Height and Capacity:

- The maximum height for pallets should be between 200cm to 240cm, depending on the sterilization chamber used for validation.
- Our sterilization chambers can accommodate up to 16 EURO pallets or 14 US pallets, depending on your logistical preferences.

Pallet Configuration:

- A well-designed pallet configuration enhances product safety, facilitates easy identification of merchandise, and simplifies the process of identifying and picking laboratory samples.
- It is recommended to use plastic pallets due to their reduced absorption of gas and better durability.
- Strapping materials should be heat resistant as the temperatures can weaken certain packaging materials.

MedistriFilm

- After sterilization, each pallet is securely wrapped with MedistriFilm. This additional layer provides protection during transport and serves as a visual indicator to distinguish between sterile and non-sterile goods.

Inspection and Handling:

- Upon receipt, our team conducts a thorough inspection of each pallet to assess any damages incurred during shipping. In cases of significant damages, our customer service team will promptly contact you to advise on the next steps.
- Every pallet is checked against the order details registered on MyMedistri to ensure accurate matching and handling.

We understand the diverse needs of our clients, ranging from large-scale production batches to small, delicate R&D samples. We are equipped to sterilize or treat all volumes.

Whether it's a few R&D samples in an envelope or small batches to larger shipments. This flexibility allows us to serve a wide range of industries and needs, ensuring that every client receives tailored and effective sterilization solutions.

Providing Sterilization & Laboratory Services
for the world's most innovative healthcare
companies.

The New Stack of Fully Integrated Services.

Laboratory Infrastructure

Chemistry

Biocompatibility & Toxicology

Sterility Assurance

Extractable's & Leachable's
